ABOUT

Dedicated and results-driven Computer Science student with knowledge in Web Development, Data Structures & Algorithms, Operating Systems, Compiler Design, and Theory of Computation. Actively seeking a Software Engineer Internship to apply technical skills and problem-solving abilities. Skilled in collaborating with cross-functional teams and contributing to innovative, global technology projects.

PROJECTS

NAUKRI-MITRA (Full stack job portal)

- Created a comprehensive job portal featuring user authentication, job listings, and application tracking.
- Integrated front-end technologies (React.js, HTML, CSS) with a back-end framework (Node.js, Express) and a database (MongoDB) for a seamless user experience.

HANZELLE (Local Clothing Shop)

- Built “Hanzelle”, a MERN-stack eCommerce website customized for a local clothing shop.
- Added user authentication, product catalog, cart management, responsive UI, and an admin dashboard for inventory management and order tracking.
- Currently enhancing features by improving UI/UX, adding advanced filters, and optimizing backend performance for better scalability.
