OBJECTIVE

To work in a dynamic environment that fosters innovation and growth, where I can apply my skills to contribute meaningfully to organizational success while enhancing my professional expertise.

EDUCATION

High School form Up Board	(2021-2022)
Intermediate from Up Board	(2022-2023)
B. Tech (Computer Sc. & Engg.)	(2023 – Pursuing)
IFTM University, Moradabad, Uttar-Pradesh	

SKILLS

- Frontend Development
- Backend Development
- Problem-Solving
- PowerPoint Presentation
- Communication Skills
- AI/ML Basics

PROJECTS

AI-Powered Career Recommendation App

- Built ML-powered recommendation engine (**classification + NLP**) trained on 10K+ profiles, achieving 92% accuracy in predicting career roles.
- Enhanced match relevance by 65% with multi-factor scoring; reduced decision-making time by 40% via interactive **React + Tailwind UI**.
- Integrated **Open-AI API** for resume analysis & insights, boosting precision by 30%; pilot-tested with 200+ users, achieving 85%+ satisfaction.
- Deployed on AWS (Node.js + MongoDB + Socket.IO), supporting 5K+ concurrent users with <200ms latency.

Weather App

- Built a **real-time weather application** using **React.js** and **OpenWeatherMap API** to display live temperature, humidity, and weather conditions.
- Implemented **city-based search**, **dynamic UI updates**, and **responsive design** for mobile and desktop users.
- Utilized **React Hooks** (useState, useEffect) for API integration and state management.

- Ensured **error handling** for invalid user inputs and optimized API calls for faster response.

Realtime Device Track

- Developed a **Realtime Device Tracking System** using **React, Node.js, Express, MongoDB, and Socket.io**
- Integrated **Google Maps API** to display live device locations with dynamic marker movement
- Implemented **WebSocket communication** for instant location updates without page reload
- Designed a **responsive and modern UI** for smooth user experience across all devices
- Ensured **secure user authentication** and data storage using **JWT** and **MongoDB**
- Showcased strong skills in **full-stack development, API integration, and real-time data handling**
