Education

Rungta college of Engineering and Technology, Bhilai, Information Technology Sept 2022 – June 2026

- CGPA: 7.1
- **Coursework:** Computer Network, Database Management System, Operating System, Data Structures.

Skills

Programming Languages: Java, Python, C, JavaScript

Core Computer Science: Data Structures & Algorithms, Object-Oriented Design, DBMS, OS

Databases: Microsoft SQL Server(MSSQL), MONGODB

Backend & APIs: Node.js, Express.js, RESTful APIs

Tools & Technologies: Git, GitHub, VS Code, Eclipse

Experience

Packaged App Development Associate Intern, Accenture – Pune, India May 2025 – July 2025

- Worked on enterprise-level, database-driven applications with focus on Microsoft SQL Server (MSSQL).
- Assisted in writing, debugging, and optimizing SQL queries for structured datasets in production-like environments.
- Collaborated with cross-functional teams to analyze application issues and propose technical solutions.
- Gained exposure to large-scale systems, structured development workflows, and professional coding standards.

Projects

Online Exam Proctoring System - Full-Stack Application— Live Demo github

- Designed and developed a scalable backend architecture using RESTful APIs to manage exams, users, evidence logs, and results.
- Implemented real-time monitoring features including face detection, object detection, audio analysis, and tab-switch tracking.
- Built session-based evidence storage for snapshots, alerts, and activity logs to support integrity and auditability.
- Developed admin dashboards for exam creation, monitoring, automated evaluation, and result generation.

Automated Attendance System - React.js, Node.js, MongoDB github

- Developed a full-stack attendance system using real-time face detection and facial embedding comparison.
- Built backend APIs to handle secure student enrollment, attendance records, and verification workflows.
- Designed a modular architecture separating frontend components, backend services, and database layers.

Achievements

- Solved 700+ Data Structures & Algorithms problems in Java across multiple platforms.
- TCS CodeVita session 13 cleared Round 1 and Round 2
- Finalist in HackIndia Web3 Blockchain Based HACKATHON

Certification

- Advanced problem solving and DSA with Java—GeeksforGeeks
- GDG Solution Challenge—Hack2Skill
- Artificial Intelligence Primer Certification— Infosys Springboard!

Additional Information

- Strong problem-solving ability with a focus on writing clean, maintainable, and efficient code.
- Fast learner with the ability to adapt quickly in a fast-paced, agile engineering environment.
