Professional Summary

Motivated and curious undergraduate student with a solid foundation in programming using C++ and Python. Enthusiastic about software development and problem-solving with a strong desire to learn and grow in the tech industry. Currently pursuing B.Tech and engaged in self-learning through academic projects and online resources.

Skills

- Programming Languages: C++, Python (Basic)
- Problem Solving
- Object-Oriented Programming (OOP)
- Team Collaboration & Communication
- Time Management
- Basic Data Structures and Algorithms

Projects

- **Simple Calculator using C++:** Developed a basic console-based calculator that performs arithmetic operations using switch-case and functions.
- **Number Guessing Game in Python:** Built an interactive terminal-based game using loops and conditionals to guess a random number.
- **Student Record Management System (C++):** Created a simple CRUD-based system to add, display, update, and delete student records using file handling.
- **To-Do List App (Python):** Created a simple terminal-based to-do list application using Python that allows users to add, view, and delete tasks. Focused on user input handling and data storage using lists.
