PROFILE SUMMARY

Computer Engineering undergraduate with hands-on experience building MERN stack applications and AI-powered platforms. Skilled in Mern stack, with a proven ability to design secure, user-focused solutions and work effectively in team environments. Seeking a dynamic engineering role to contribute to innovative solutions and organizational growth.

EDUCATION

Fr. Conceicao Rodrigues College of Engineering, Mumbai
Bachelors of Engineering in Computer Engineering

Present

Holy Family Convent High School
Class XI, XII

2021 - 2023

WORK EXPERIENCE

Junior Design Head | CODELABS, Fr. CRCE

April 2024 - 2025

- Assisted in organizing club events including technical workshops, speaker sessions, and competitive programming contests.
- Designed promotional material such as social media posts, presentations, and banners using Figma and Canva.
- Contributed to UI/UX design for event branding and ensured visual consistency across all communication channels.
- Collaborated with cross-functional teams to coordinate event logistics and outreach efforts.

TECHNICAL SKILLS & AWARDS

Skills:

- Languages:** C, JavaScript, Python
- Frameworks & Libraries:** React, Redux Toolkit, Tailwind CSS, Bootstrap, MongoDB, Express.js, Node.js
- Tools & Technologies:** Git, Github, REST APIs, Canva, Figma, Framer

Awards and Achievements:

- 1st Runner-Up | Google Cloud GenAI Exchange Hackathon 2025

PROJECTS

DIDI'S DIGITAL SAATHI - Voice-based sales, inventory & demand analytics platform | MERN Stack, Web Speech API

- Built a full-stack sales and inventory management system using React.js, Node.js, Express, and MongoDB Atlas, enabling small businesses to log transactions through voice or text input.
- Integrated automated inventory tracking with real-time stock updates and low-stock alert notifications based on predefined thresholds.
- Implemented demand forecasting using historical sales data in Python, along with interactive revenue and sales trend dashboards and text-to-speech functionality to enhance accessibility and business insights.

MISINTEL – AI-Powered Misinformation Detection Platform | Web App, Chrome Extension, WhatsApp Bot

Live Demo: <https://misintel.vercel.app/> | **GitHub:** <https://github.com/Hike-12/Misintel> | Google Hackathon – 1st Runner-Up

- Built a cross-platform AI verification system that detects misinformation across text, URLs, images, videos, and audio, enabling users to fact-check content instantly through a web app, Chrome extension, and WhatsApp bot.
- Developed a multi-AI pipeline using Google Gemini, Fact Check API, Custom Search, Safe Browsing to perform context-aware credibility analysis, real-time source verification, and malicious content detection at scale.
- Implemented explainable AI features including highlighted misleading phrases, credibility scores, author detection, and “why-flagged” explanations, improving user trust and media literacy beyond simple true/false verdicts.

ACTIVITIES

VOLUNTEER, COMMUNITY ENGAGEMENT PROJECT (CEP)

ST. ELIZABETH CONVENT, VASAI | AUG – OCT 2024

Worked with children (ages 8–19) with special needs through art, games, and learning activities. Helped foster creativity, inclusion, and emotional connection in a supportive environment.
