PROFESSIONAL SUMMARY

Security Product Developer skilled in building and securing software products from concept to deployment. Experienced in **secure SDLC**, **product security reviews**, **threat modeling**, and **secure API development**. Adept at integrating **DevSecOps practices** into Agile workflows and delivering scalable, cloud-native applications. Strong collaborator with product and engineering teams, ensuring **security-by-design** without compromising product performance.

PROFESSIONAL EXPERIENCE

Security Software Developer June 2025 – July 2025
Cyber Cell, Meghalaya Police Shillong, India

- Implemented a **security product** (phishing-blocking browser extension) using React, Tailwind, Firebase — deployed across state government systems, securing users daily.
- Built an **endpoint monitoring platform** (Wazuh + Filebeat + Elasticsearch), enabling real-time product log analysis.
- Partnered with cyber cell team to enforce **secure coding standards** and improve their website security.

Cybersecurity Intern Jan 2025 – Mar 2025
Centre for Development of Advanced Computing (CDAC) Noida, India

- Developed a **ransomware simulation tool** in Python for product testing and resilience validation, later used in security training programs.
- Conducted sandbox testing and code vulnerability assessments to identify weak points in software systems.
- Gained hands-on expertise in system-level programming and threat modeling for secure development.

KEY PROJECTS

CTF Platform Jan 2025 – Mar 2025

- Engineered a full-stack platform (Node.js, Express.js, Tailwind) with secure APIs, authentication, and role-based access for **cybersecurity product training and CTF's**.
- Successfully hosted CTF event with **100+ participants**..

Endpoint Detection & Monitoring System Jun 2025

- Built a real-time **product security dashboard** with Wazuh + Elasticsearch + Kibana, improving product security visibility and accelerating incident triage by **25%**.
- Created Kibana dashboards for visualizing threats and improving incident response.

Securing NIT Meghalaya Website Jun 2025

- Identified and remediated **critical vulnerabilities**, then refactored website practices to align with **product security standards**..
- Implemented secure coding practices and configuration changes, reducing exposure to web-based attacks.

Certifications

- Certified Ethical Hacker (CEH v13 AI) – Aug 2025
- Palo Alto Network and Cloud Security Certification – Oct 2024
- Prompt Engineering and AI Certification – Aug 2025
- Postman API Fundamentals Student Expert – May 2024

EDUCATION

Bachelor of Technology 2023 – 2027
Electronics & Communication Engineering NIT Meghalaya GPA: 8.32/10.0

Intermediate (12th Grade) 2022
St. Thomas School Kanpur, India
Percentage: 95%

TECHNICAL SKILLS

Programming Languages

- Java, Python, JavaScript, HTML/CSS

Frameworks & Technologies

- React, Node.js, Express.js, Tailwind CSS, Firebase

Cybersecurity Tools

- Wazuh, BurpSuite, Nmap, Metasploit, Snort, EDR solutions

Core Technologies

- Data Structures & Algorithms, Operating Systems, DBMS
- Full-stack Web Development, API Development
- Vulnerability Assessment, Threat Detection, AWS, Docker

ACHIEVEMENTS

- State-wide deployment of security extension across Meghalaya government.
- 2nd place in Capture the Flag (CTF) competition at NIT Meghalaya.
- Government cybersecurity project contributions with measurable impact.
- Successfully managed college-wide CTF event with 100+ participants.
- Strong academic performance with GPA 8.32/10.
