KEY SKILLS Programming

Languages –

- HTML
- CSS
- Tailwind CSS
- JavaScript
- React.JS
- Express.JS
- Node.JS
- MongoDB
- Python
- Python Libraries

Tools –

- Git
- GitHub
- VS Code
- Anaconda Navigator
- Figma
- Canva

CERTIFICATIONS

- Easy Shiksha
- UDEMY (Python)
- UDEMY (Full Stack Web Developer)

Aryan Choubey

FULL-STACK WEB DEVELOPER

Motivated Full Stack and Python Developer with hands-on experience in frontend development and backend logic using Python. Eager to contribute to a dynamic team, learn new technologies, and develop efficient, user-centric applications.

INTERNSHIP/EXPERIENCE

FRONTEND DEVELOPER INTERN - NEXUS INFO

<https://nexusinfo.in/>

Developed responsive and interactive user interfaces using React.js, HTML, CSS, JavaScript, and Tailwind CSS. Built dynamic components and followed best practices for clean and reusable code. Collaborated with team members using Git and GitHub for version control.

EDUCATION

- ▣ Master of Computer Applications (MCA)
2026
Chhattisgarh Swami Vivekanand Technical University, Bhilai
Grade - Pursuing
- ▣ Bachelor of Computer Applications (BCA)
2024 | Hemchand University | Grade – 70 %
- ▣ Diploma in Computer Applications (DCA)
2022 | C.V. Raman University | Grade – 80 %
- ▣ 12TH | JLM GAYATRI VIDYA PEETH RAJNADGAON (C.G)
GRADE 94% | 2021

LANGUAGE

- English
- Hindi

Strength

- Problem Solving
- Multitasking
- Time Management
- Leadership

Projects

AI-Powered Real-Time Collaboration Platform

Developed a real-time collaborative workspace with AI assistance using MERN stack, Socket.io, WebRTC, and Redis. Implemented live editing, presence sync, AI-based suggestions, and multi-user group audio/video calling with WebRTC signaling. Built for high-performance teamwork, seamless communication, and smart content generation.

GITHUB : <https://github.com/ARYAN-CHOUBEY09/AI-COLLAB>

Employee-Task-management-system

Developed a role-based Employee Task Management System using React and Tailwind CSS, enabling Admin to assign tasks and Employees to view, complete, or delete them. Integrated Login/Logout functionality with user role distinction (Admin & Employee) and used Local Storage for session handling and task persistence.

GITHUB : <https://github.com/ARYAN-CHOUBEY09/Employee-Task-management-system>

Stock Trend Analyzer

The project involves analyzing stock market data obtained from Wikipedia or news channel using Python and Jupyter Notebook. The analysis will utilize libraries such as pandas for data manipulation, and technical indicators for feature extraction. Machine learning algorithms will be employed to train predictive models, and the results will be evaluated for accuracy and reliability.

GITHUB : <https://github.com/ARYAN-CHOUBEY09/AIML-PROJECT/tree/main/Stock%20Trend%20Analyzer>

ML-Based Stroke Risk Prediction

The project involves analyzing the Heart Disease dataset from the UCI Machine Learning Repository using Python and Jupyter Notebook. The analysis will leverage libraries such as numpy and pandas for data manipulation, and sklearn.model_selection for splitting the dataset into training and test sets. Logistic Regression will be used to build a predictive model to determine the presence of heart disease based on various medical attributes.
