Summary

A very optimistic and positive developer equipped with all vital skills that fuels growth and achieves the targets. I work with my full potential to deliver the results that speaks and count.

Technologies

Programming Languages: Java, Python, JavaScript and C++

Development Practices: Data Structures and Algorithms, Object-Oriented Programming, software design

Other: Marketing, branding and software development

Experience

- Clearly understood the concepts of C++ language and Data structures.
- Worked on various projects that are necessary to understand the concepts of C++ and OOPS.
- Bootcamp on big data & data science from CDAC, Noida in association with K.R. Mangalam University
- Completed a Google Analytics certification, gaining hands-on expertise in tracking, reporting, and audience targeting
- Certified in Data Analytics by Technoglobe (Course completed in English)

Projects

HR and Employee Attrition Analysis

- Performed HR analytics to identify key drivers of employee attrition using EDA and statistical modeling.
- Built dashboards to track attrition by department, tenure, and performance.
- Delivered insights to support retention strategies and reduce turnover.

Sales Performance Analysis

- Conducted sales analytics to evaluate revenue trends, customer segments, and product performance.
- Used data visualization to highlight sales patterns and support data-driven decisions.
- Improved forecasting accuracy using historical data and KPI tracking.

Customer Churn Analysis

- Analyzed customer churn using data cleaning, EDA, and predictive modeling.
- Identified churn-driving factors and segmented customers based on risk scores.
- Provided actionable recommendations to improve customer retention.

Weather Forecasting

- Built a weather forecasting model using time-series analysis and machine learning.
- Analyzed historical climate data to identify seasonal and temporal patterns.
- Improved prediction accuracy through model tuning and feature engineering.

KR Mangalam University, BCA (AI&DS), Currently Pursuing

Aug 2023 – Aug 2026

Carmel Convent School, Class 12, Percentage: 90

Apr 2026 – June 2023

Achievements

- IBM Python developer certified
- IBM Big Data Engineer certified
- Amazon AWS computing certified
- Regularly participated in university Hackathon.
- Google Analytics Certified (2024)
