

NIKHIL DUBEY

SOFTWARE ENGINEER

+91 9098309221 | work.nikhildubey@gmail.com | LinkedIn | Github | Portfolio | Leetcode | GFG

SUMMARY

Final year Computer Science Engineering student passionate about Generative AI, Large Language Models (LLMs), and scalable AI systems. Skilled in Python, C++, SQL, and full-stack development, with hands-on experience in deep learning, transformers, prompt engineering, and vector databases. Experienced in building end-to-end AI applications, optimizing models, and integrating them into production-ready systems. Strong leadership background in coding communities and hackathons.

TECHNICAL SKILLS

- **Programming:** Python, C++, SQL, JavaScript
- **AI/ML & Generative AI:** PyTorch, TensorFlow, Hugging Face, LangChain, OpenAI API, Pinecone, FAISS, n8n, Zapier, Make
- **Web Development:** React.js, Node.js, Flask, FastAPI, REST API
- **Databases & Cloud:** MySQL, MongoDB, Firebase, Google Cloud (GCP)
- **Tools & Systems:** Git/GitHub, Docker, REST APIs, Postman, Jupyter, Streamlit
- **Concepts:** Data Structures & Algorithms, Machine Learning, LLM Fine-tuning, RAG (Retrieval-Augmented Generation), Prompt Engineering, Scalable System Design

PROJECTS

StudySync - AI

2025

- Built an AI-powered study planner using Next.js, Firebase, and Google Gemini API, enabling students to generate personalized study schedules and receive task prioritization through a conversational chat interface.
- Implemented Firebase Authentication and Firestore integration for secure Google Sign-In, real-time task management, and persistent user data storage with role-based access rules.
- Developed accountability features including a prototype “Buddy Sync” system to connect students with peers, share progress, and enhance motivation, supported by a responsive, mobile-friendly UI (Tailwind CSS + shadcn/ui)

Cognito – AI Voice Assistant

2025

- Developed an AI-powered voice assistant (“Cognito”) using Next.js, TypeScript, and Google’s Gemini AI, enabling real-time speech-to-text, natural language processing, and text-to-speech interactions.
- Implemented voice-first features including intelligent command execution, note-taking system with local persistence, and application launcher, improving hands-free accessibility and user productivity.
- Integrated Firebase Hosting and Google AI Genkit flows for scalable deployment, ensuring secure API integration, responsive UI, and seamless AI driven query handling with modern design principles (Tailwind, Radix UI)

EDUCATION

Bachelors of Technology (B.Tech)

Aug 2022 - Present

- Avantika University, Ujjain
- Major in Computer Science and Engineering
 - 7.75 CGPA

Class 12

2021 - 2022

- Vidhyanjali International School, Barnagar (CBSE)
- 88.4 %

LEADERSHIP AND VOLUNTEERING

GDG on Campus Organizer (Present)

President – Programmers Club, Avantika University

- Directed 20+ events, coding competitions, and workshops
- Promoted peer learning and collaborative development

Technical Lead – GeeksforGeeks Chapter [Link](#)

- Mentored juniors in DSA and project building
- Organized data science hackathons and training programs

CERTIFICATIONS

- Full Stack Programming – [Udemy](#)
- Javascript – [Udemy](#)
- Python Programming- [Udemy](#)
- C Programming - [Udemy](#)
- MySQL Bootcamp - [Udemy](#)
