PROFESSIONAL SUMMARY

Motivated Data & Business Analyst open to both internship and full-time roles, skilled in Power BI, SQL, Excel, and Python. Adept at analyzing data, building dashboards, and generating actionable business insights that drive process improvements and decision-making. Strong foundation in data visualization, KPI reporting, and business metrics, with hands-on project experience in multiple domains. Eager to contribute to data-driven organizations across Delhi NCR or remote settings.

TECHNICAL & ANALYTICAL SKILLS

Programming & Databases: Python, SQL (MySQL)

Data Visualization: Power BI, Advanced Excel

Business Analysis: KPI Reporting, Workflow Optimization, Requirements Gathering

Statistical Analysis: Hypothesis Testing, Trend & Correlation Analysis

Soft Skills: Problem Solving, Data Storytelling, Communication, Team Collaboration

Portfolio: Available upon request

PROJECTS

Airline Operational Dashboard (Power BI)

- * Cleaned and transformed 100K+ airline records using Power Query and DAX.
- * Built KPI-based dashboards for flight performance, delays, and bookings.
- * Improved analysis speed by 40% and simplified management reporting.

WALMART RETAIL INSIGHTS (MYSQL)

- * Analyzed multi-store data to identify top-performing products and customers.
- * Developed SQL queries for segmentation and profitability tracking.
- * Provided insights that enhanced product strategy and sales planning.

KPMG CUSTOMER SEGMENTATION (EXCEL)

- * Cleaned and standardized customer and transaction data for accuracy.
- * Segmented customers by demographics and purchase patterns.
- * Identified high-value groups, enabling targeted marketing recommendations.

ELECTRIC VEHICLE MARKET ANALYSIS (PYTHON)

- * Conducted a data-driven study on EV market trends (Tesla vs Audi).
- * Performed hypothesis testing on engine performance and range.
- * Designed a simple EV recommendation framework based on user needs.
