+91 6232980314 | [alizafar6232@gmail.com](mailto:alizafar6232@gmail.com) | [linkedin.com/in/ZafarAli001](https://linkedin.com/in/ZafarAli001) | [github.com/zafar-ali](https://github.com/zafar-ali)

## EDUCATION

**Rungta College of Engineering and Technology**

*Bachelor of Technology (B.Tech)*

Bhilai, Chhattisgarh

August 2022 – June 2026

## PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in full-stack development using Java, React, Node.js, Express, and MongoDB. Strong foundation in Data Structures, OOP, DBMS, and SDLC with practical exposure to building scalable RESTful APIs, implementing secure authentication (JWT), and developing production-ready and scalable web applications. Experienced in Agile/Scrum-based collaborative development, Git-based version control workflows, production deployment, and API integration. Seeking an entry-level Software Developer role to contribute to scalable and efficient software solutions

## SKILLS SUMMARY

**Languages:** Java, JavaScript, SQL, C, Python

**Web:** React.js, Node.js, Express.js, RESTful APIs, HTML, CSS, Tailwind CSS

**Databases :** MongoDB (NoSQL), MySQL (Relational DB), Data Modeling, Query Optimization

**Core CS:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Software Development Life Cycle (SDLC), Cybersecurity Fundamentals

**Developer Tools:** Git, GitHub, Linux, VS Code, Excel, Postman

## ACADEMIC PROJECTS

**CivicOne Bhilai** (GitHub) | *React, Tailwind CSS, Node.js, Express, MongoDB, JWT*

July 2025 – Present

- Independently designed and developed a scalable MERN stack municipal platform implementing RESTful APIs and MVC architecture.
- Engineered JWT-based authentication and role-based authorization (RBAC) ensuring secure access control.
- Built complaint tracking module with image uploads, geolocation integration, and real-time status updates.
- Applied structured error handling, input validation, and API testing using Postman to ensure secure and reliable backend performance.
- Implemented asynchronous processing for image uploads and notifications, improving backend scalability and concurrent request handling in production environment.

**Smart Resume Analyzer** (GitHub) | *Python, Flask, NLP, Machine Learning*

March 2025 – June 2025

- Collaborated in a team of developers to design, build, and deploy a Flask-based NLP web application for resume-job compatibility analysis.
- Implemented TF-IDF vectorization and tokenization for structured resume parsing.
- Designed cosine similarity scoring algorithm to compute job-role compatibility and automate skill-gap analysis.

**BillEase** (GitHub) | *React, Node.js, Express, MongoDB, JavaScript*

Jan 2025 – Feb 2025

- Developed a modular full-stack billing system using MERN stack with REST API-based architecture.
- Implemented automated invoice generation and tax calculation logic.
- Implemented invoice sharing and payment status tracking features with secure CRUD operations, input validation, and optimized database queries.

## ADDITIONAL EXPERIENCE & CERTIFICATIONS

- Completed Full-Stack Web Development training covering REST API development, authentication, and deployment fundamentals.
- Certified in Data Structures & Algorithms using Java (Coding Spoon).
- Practiced and solved over 100 algorithmic problems on LeetCode to enhance problem-solving skills.
- Certified in Git & GitHub (LetsUpgrade), with hands-on experience in branching, merging, and version control workflows.
- Participated in IAM-focused cybersecurity job simulation (Tata Group – Forage).
