Academic Details

- **Bachelor of Technology (B.T.)**
- **Artificial Intelligence Machine Learning (AIML)**

Gyan Ganga Institute of Technology and Sciences, Jabalpur;
CGPA: 7.31
(2026)

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:**

JavaScript, Python, C++

- **Frameworks:**

TensorFlow, Keras, PyTorch, Scikit-learn

Core Competencies

Agile Methodologies

Software Development Life Cycle

Restful API

Debugging

Containerization

Web Services

Microservice Design

Performance Optimization

System Scalability

Profile Summary

- **Machine Learning Developer** with expertise in Python, machine learning frameworks (TensorFlow, Keras, PyTorch), and data analysis. Proficient in designing and implementing models for image classification, object detection, and predictive analytics.
- Participated in **hackathons and innovation challenges**, contributing to successful AI-driven solutions, including a crop disease prediction system and gender classification model.
- Skilled in both **model development** and **application deployment**, with experience integrating ML models into web-based applications using React, Node.js, and Express.js.
- Strong communicator and team player, adept at leading and collaborating on multidisciplinary teams to achieve shared goals.

Responsibilities:

- Led teams as a **Machine Learning Developer and Team Leader** in SIH hackathons, focusing on building robust AI solutions with a clear impact.
- Worked closely with team members to analyze project requirements, aligning individual strengths with tasks for optimized workflow and project success.
- Provided guidance on implementing machine learning models and optimizing their performance, ensuring alignment with project goals.
- Delivered articulate presentations on machine learning solutions in competitive environments, confidently showcasing technical knowledge and project outcomes.
- Improved team efficiency and productivity by fostering an environment that encouraged innovation and collaborative problem-solving.

Achievements:

- Demonstrated exceptional leadership in hackathons, guiding teams to successfully deliver AI-driven solutions for real-world problems, including crop disease management and image classification.
- Established a reputation for **effective communication** and team building, forging meaningful connections with peers and mentors in the ML community.
- Played a key role in integrating ML models into **full-stack applications**, combining technical expertise in machine learning with web development skills.
- Elevated team performance by fostering collaboration and encouraging members to pursue personal and technical growth.

Academic Projects

Gender Classifier

Tools: Python, TensorFlow, Keras, OpenCV

Roles: Built and deployed a CNN model using TensorFlow and Flask for real-time gender classification with high accuracy.

SMS Spam Classifier

Tools: Python, Scikit-learn, Pandas, Numpy, Flask

Roles:

- Built and trained a machine learning model using **Scikit-learn** to classify SMS messages as spam or not spam with high accuracy.
- Developed a **Flask-based web interface** for real-time user interaction and deployed the model in a production environment.
