

SOLIPURAM HARSHAVARDHAN REDDY

Contact Number: 9515787930

Email: Harsha.solipuram@gmail.com

SUMMARY

Energetic and dedicated Electronics Engineering graduate with a strong passion for emerging technologies and continuous learning. Driven by curiosity and a commitment to innovation, with a focus on building problem-solving abilities through hands-on experience. Recognized as a quick learner, adaptable, and hardworking. Eager to contribute meaningfully and grow within a dynamic, forward-thinking team.

EDUCATION

Bachelor of Technology - Electronics and Communication Engineering

Geethanjali College of Engineering and Technology

Nov 2021- May 2025

CGPA: 7.8

Intermediate

Akshara Junior College

Jun 2019- May 2021

Percentage: 72

School (CBSE)

St. Andrew's High School

Jun 2018- May 2019

Percentage - 75

TECHNICAL SKILLS

Programming Languages: Python, C.

Web Development: HTML, CSS.

Tools & Applications: Canva, Figma, Illustrator.

INTERNSHIP AND CERTIFICATIONS

Embedded Systems and IoT Intern- NSIC

- Gained practical experience in embedded systems using Arduino Uno. Learned to implement contactless automation for improved hygiene and usability.
- Developed skills in embedded programming, sensor integration, and actuator control.

Completed an Internship on **Amazon Web Services** and learnt the basic principles and tools useful for it.

PROJECTS

Stock Price Prediction using Deep Learning (Dec 2024 – Mar 2025)

Developed and evaluated a robust stock forecasting system by implementing and comparing multiple models, including Linear Regression, Random Forest, LSTM, and RNN.

The project involved advanced data preprocessing, feature engineering (integrating sentiment/macro data), and rigorous performance assessment using MSE and directional accuracy to identify optimal models for non-linear, time-series financial data.

IoT Based Power Management System (Oct 2024 – Dec 2024)

Developed a hybrid, cost-effective IoT home automation system utilizing the NodeMCU ESP8266 and Blynk platform for remote appliance control.

Engineered seamless integration between smart and traditional manual switches using relays, ensuring both remote and local operational reliability.

Demonstrated the feasibility of a highly scalable system that provides real-time control, feedback, and broad compatibility without requiring existing infrastructure overhaul.

ACHIEVEMENTS

- Volunteer in the event “GS – MUN 2K25” held in college.
- Volunteer in the event “International Conference on Computational Intelligence in Machine Learning (ICCIML) 2023” held in college.
