918468827486 | lanjewarhasina1@gmail.com | Nagpur, India

SUMMARY

Passionate Data Scientist eager to apply analytical skills to solve real-world problems. Driven by curiosity to uncover insights from data and transform them into actionable strategies. Motivated to leverage machine learning and visualization tools to make data meaningful and impactful. Committed to contributing to **data-driven innovation** and delivering insights that create measurable value for organizations.

EDUCATION

J D College of Engineering and Management <i>Bachelor's, CSE(Data Science)</i>	Nov 2022- April 2026 GPA: 9.1
Mahatma Gandhi Junior College <i>HSC</i>	July 2021- April 2022 GPA: 77
Kuthe Patil English High School <i>SSC</i>	July 2019- April 2020 GPA: 89

PROJECTS & OUTSIDE EXPERIENCE

Detection of Diabetic Retinopathy using CNN to prevent vision-threatening diseases	June 2024 - November 2025
- Problem: Diabetic Retinopathy (DR) is a leading cause of preventable blindness worldwide, often progressing silently until vision is severely impaired. - Built CNN model in TensorFlow/Keras for Diabetic Retinopathy detection - Applied image preprocessing & augmentation using OpenCV, NumPy to improve robustness - Used transfer learning (ResNet/VGG16), dropout, and hyperparameter tuning for optimization - Evaluated with Scikit-learn metrics (accuracy, sensitivity, specificity, AUC) - Delivered scalable AI solution for early DR screening to prevent vision-threatening disease	
RetailPulse: Multi-Channel sales analytics platform	May 2025
- Developed RetailPulse platform for unified sales analytics across multiple channels (online, offline, marketplaces) - Integrated diverse data sources (POS systems, e-commerce APIs, CRM) into a centralized data warehouse - Implemented ETL pipelines using Python, SQL, Pandas for automated data ingestion and transformation. Built interactive dashboards with Power BI to visualize KPIs like revenue, conversion, and customer trends - Applied machine learning models for demand forecasting, customer segmentation, and sales performance prediction - Delivered actionable insights that improved sales strategy, optimized inventory, and enhanced customer engagement	
IOT BASED SMART STREET LIGHT SYSTEM	September 2025
- Designed IoT-enabled smart street lighting system to optimize energy consumption and reduce operational costs - Integrated sensors (LDR, PIR, motion detectors) for automatic brightness control based on ambient light and human/vehicle movement - Implemented microcontroller (Arduino/ESP8266) with wireless communication for real-time monitoring and control - Developed cloud dashboard for data logging, remote access, and performance analytics using IoT platforms (Arduino IDE) - Achieved significant energy savings by enabling adaptive lighting and automated ON/OFF scheduling - Contributed to sustainability goals by reducing carbon footprint through smart energy management	
sales analytics dashboard using Excel Pivot tables	January 2024
- Developed interactive sales dashboard using Excel Pivot Tables for multi-dimensional data analysis - Automated data aggregation & summarization to track KPIs (revenue, region-wise sales, product performance) - Created dynamic charts & slicers for real-time filtering and visualization of sales trends - Applied advanced Excel functions (VLOOKUP, INDEX-MATCH, conditional formatting) to enhance reporting accuracy - Improved decision-making efficiency by reducing manual reporting time and enabling quick insights	

Skills

Programming Languages : *Python, HTML/CSS, C/C++, aurduino IDE*

Analytical & Development Tools: *Jupyter, Anaconda, R studio, Microsoft Excel, Figma*

Statistics, Machine Learning and NLP: *Data Analysis and Visualization, ML Algorithms, Natural Language Processing.*

Database: *SQL, Power BI, Mongo DB, Excel pivot*

Languages: *Marathi, Hindi, English*

Soft skills: *Analytical Reasoning, Clarity and Conciseness, Understanding Business Objectives.*

CERTIFICATIONS

IIT Bombay Certification: Completion of Cpp Training,

NPTEL Certification : Cloud Computing , Digital Productivity

Infosys Springboard Certification: Big data 301, Python for Data Science

Department competition of Aptifest : Aptitude Test

WORKSHOPS

- Python for Data Science
- Application Using Data Structure
- Basic of Python
- Introduction to Deep Learning and Reinforcement (IEEE Summit)

Hobbies

- Blogging
- Video Editing
- Travelling
