About Me

I'm Jayanth SD, a Grad student and tech enthusiast with a focus on Data Scientist, Data Analyst and Interested in ML based roles and Cloud based-platforms like (Google Cloud Platform, MS Azure, AWS). As a PG student, I am eager to kickstart my journey in the tech industry through a challenging intern or fresher. Although I may be new to the professional scene, my passion for technology is matched by a solid foundation in Data Analyst and a keen interest in cloud platforms and ML Based roles. What I lack in experience, I make up for with a quick learning curve and effective communication skills. I'm excited about the opportunity to contribute to a dynamic team and eager to absorb knowledge and skills on the way. Let's embark on this learning adventure together!

Achievements

- Fresher, worked on a Driver Monitoring System - **SARATHI** Project for IEEE Hackathon-2023

2023

SAARATHI - Safety Assisted Automated Road Tech for Highway Independence. :

Safety Assisted Responsive Automated Tech for Highway Independence is a groundbreaking project designed to address the critical issue of safety on highways.

Roles and Responsibilities:

- Been a impact-full and a responsible teammate, research, design and developer.
- Been a tester.
- Market analysis, Future scope, Application Implementation and others.
