EDUCATION

Fr. Conceicao Rodrigues College of Engineering

B.E. Electronics & Computer Science (Honours in AI/ML)

Mumbai, India

Aug. 2023 – May 2027

Narayana Junior College

Higher Secondary Certificate (Science)

Mumbai, India

Jul. 2022 – May 2023

EXPERIENCE

1Stop

Remote

Machine Learning Intern

Jan. 2024 – Apr. 2024

- Fine-tuned pre-trained models and implemented evaluation pipelines to benchmark model performance across tasks.
- Built modular data preprocessing and model training scripts; implemented REST inference endpoints to integrate models with frontend services.
- Improved model inference performance and aided reproducible experiment tracking.

Mozilla Campus Club

Mumbai, India

Vice Chair Person

Jul. 2025 – Present

- Organized AI/ML and full-stack workshops; mentored students on model deployment, testing and best practices.
- Led technical sessions on practical ML tooling and pipelines.

Fr. CRCE

Mumbai, India

Head — Student Training & Placement Coordinator

2025 – Present

- Coordinated placement training, mock interviews and recruiter interactions; designed DSA and system-design practice modules.

PROJECTS

TechCollab | React, Flask, Socket.IO, ML

June 2024 – Feb 2025

- Built a full-stack collaboration platform with a real-time editor and session management APIs.
- Integrated ML models for context-aware code suggestions and in-editor debugging assistance; added CI and basic testing for reliability.

Patentra | SBERT, NLP pipeline, Flask, Firebase

Jan 2025 – Feb 2025

- Implemented semantic search using SBERT and classical ML models for CPC (classification) tagging and document recommendation.
- Developed scalable Flask APIs and React frontend with Firebase authentication for document workflows.

FaceMask | YOLO, DeepSORT, OpenCV, TensorFlow, PyTorch

Dec 2023 – Jan 2024

- Built a multi-camera face detection and tracking pipeline using YOLO and DeepSORT; served inference via Flask REST endpoints.
- Achieved 95%+ face recognition accuracy and reduced ID-switches; deployed a React dashboard for monitoring and alerts.

TECHNICAL SKILLS

Languages: Java, Python, C

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, OpenCV

AI/ML & Tools: Supervised & Unsupervised Learning, Deep Learning, YOLO, DeepSORT, SBERT, LLMs (DeepSeek)

Web & Backend: React, Next.js, Django, Flask, Firebase, PostgreSQL, MongoDB

Dev Tools: Git, GitHub, Vercel, Docker, Socket.IO

CERTIFICATIONS & ACHIEVEMENTS

GenAI Apps with Streamlit (Google Cloud)

100 Days of Code — Full Stack Web Development Bootcamp

Hackathons: Smart India Hackathon, IIIT Lucknow Hackathon (Suraksha Netra)
