EXPERIENCE

vThink Global Technologies

May 2025 – July 2025

Software Developer Intern

Chennai

- Contributed to an employee transportation system with full-stack work across APIs, database integration, and UI behavior.

Ford Motor Company

Dec 2024 – March 2025

Data Science and AI Intern

Chennai

- Developed LLM-based HR analytics workflows achieving 96% alignment accuracy, integrating preprocessing, scoring, and validation steps for HR data.

- Built Python backend pipelines and improved LLM performance using prompt engineering, chained evaluation, and Vertex AI optimization.

Innomatics Research Labs

Jan 2024 – April 2024

Data Science Intern

Remote

- Built and deployed a Flask backend on AWS for data and sentiment analysis, integrating MLflow, validating EC2 deployment, and developing GenAI apps including an AI Code Reviewer and a RAG system.

EDUCATION

Shiv Nadar University

Chennai, Tamil Nadu

Bachelor of Technology in Artificial Intelligence and Data Science, CGPA: 7.75

Aug 2022 – Aug 2026

Narayana Junior College

Vijayawada, Andhra Pradesh

Grade 12, Percentage: 90

2021 – 2022

PROJECTS

• Adversarial Attack Detection in Deepfake Models

Python, TensorFlow/PyTorch, ML/DL Models (BNNs, CNNs, GANs, XceptionNet, ResNet variants)

- Built adversarial-detection pipelines using BNNs and XceptionNet, integrating GAN-based augmentations, ResNet-50 and MesoNet baselines for ensemble detection.
- Quantified mole-based perturbations and perceptual black-box attack limits, for benchmarks and failure-case analyses.

• Agentic AI-Based Real-Time Bid Optimization System

CrewAI, Python, Web Scraping, Data Pipelines, LLM Automation

- Built an Agentic-AI workflow using CrewAI for automated tender-market analysis with cost-estimation and bid-generation modules.
- Implemented a real-time AI-mesh for data-scraping and insight-extraction to improve bidding decisions.

• Integrated Analysis of Neurodegenerative Disorders (Ongoing)

Multi-omics, Python, R, Alignment Pipelines, DE Analysis, ML Modelling, Limma, DESeq2, BWA/Bowtie2

- Developing a multi-omics workflow for early Parkinson's detection using genomic and transcriptomic signatures.
- Evaluating various alignment, differential expression, and feature-integration approaches to identify robust biomarker patterns.

ACHIEVEMENTS AND ROLES

- **CodeBattles Winner (SRM University, Feb 2024):** Led a team to develop finance-focused data analytics solutions.
- **Dataset'24 Internship Winner (VIT University, Dec 2024):** Built a telecom prediction model and a task-reallocation chatbot to optimize incident flows.
- **Intelliton 2025 Winner (Hindustan Institute of Technology, Oct 2025):** AI-driven recruitment automation pipeline to reduce bias and improve evaluation efficiency.
- **SNUC Film Club (2022 – 2024):** Served as the Point of Contact, managing communication and coordinating club activities.
- **Invente Editorial Team (2022 –2023):** Contributed to content writing, editing, and event documentation for the tech fest.
- **SSN-SNUC MUN 2023 (Sponsorship Team):** Managed sponsorship outreach and partnership coordination.

SKILL MATRIX

Programming Languages: Python, Java, SQL, HTML/CSS, JavaScript

Frameworks: Flask, Streamlit, ReactJS, Node.js, Bootstrap, Express.js

Tools: Jupyter Notebook, Visual Studio, Eclipse, MySQL, PostgreSQL, Git, GitHub, AWS, Microsoft Excel

Data Analysis and Visualization: NumPy, Pandas, Matplotlib, Seaborn, Tableau

Generative AI: GANs, LangChain, Tensorflow

Spoken Languages: English, Telugu, Tamil, Hindi

CERTIFICATIONS

- **Machine Learning and Deep Learning using PyTorch**, *GUVI Geek Networks*
- **Introduction to Large Language Models (LLMs)**, *NPTEL, Elite Certificate*
- **Data Engineering: Hands-On**, *LinkedIn Learning*
- **Social Networks**, *NPTEL, Elite Certificate*
- **Responsible and Safe AI**, *NPTEL, Silver Elite Certificate*
