Career Objective

Passionate Python Full Stack Developer with expertise in Python and databases, along with knowledge of Django and React. Skilled in building scalable, efficient web applications and APIs. Eager to work in a dynamic and collaborative team environment, leveraging technical skills to deliver innovative solutions. Aspiring to contribute to cutting-edge projects that improve user experiences while growing professionally in a fast-paced development setting.

Education

Sri Venkatesa Perumal College of Engineering and Technology, Puttur – MCA

- CGPA: 7.0

BSR Degree College, Tirupati – B.Sc in Computer Science

- CGPA: 7.7

NRI Junior College, Tirupati – Intermediate (10+2)

- CGPA: 8.3

Jnana Jyothi Vidya Mandir, Puttur – SSC

- CGPA: 9.0

Projects

Multi-Class Kidney Abnormalities Detecting Novel System Through Computed Tomography

- Built an automated system to detect and classify kidney abnormalities using CT scan images.
- Preprocessed medical image datasets and applied augmentation for improved model generalization.
- Used Convolutional Neural Networks (CNNs) with TensorFlow and Keras to achieve high accuracy.
- Deployed the system using Flask for real-time inference with a user-friendly web interface.
- **Project Stack:** Anaconda (Software), Python (Primary Language), Flask (Frontend Framework), Jupyter Notebook (Back-end Environment), SQLite3 (Database), HTML, CSS, JavaScript, Bootstrap 4 (Front-End Technologies)
- **Technologies Used:** Python, TensorFlow, Keras, OpenCV, Flask, NumPy

Technical Skills

- **Languages:** Python, SQL
- **Libraries:** Pandas, NumPy, Matplotlib
- **Frameworks:** Django, Flask
- **Databases:** MySQL, NoSQL
- **Tools:** Git, VS Code, Jupyter Notebook

Training

Full Stack Python Development – PySpiders Institute, Bengaluru

- Completed hands-on training in Python full-stack web development.
- Built RESTful APIs and front-end interfaces using Django and React.
- Worked on real-time mini-projects integrating database and deployment.
