ABOUT

Data Science and Machine Learning student with hands-on experience in Python, SQL, and Power BI. Skilled in building predictive models, recommendation systems, and interactive dashboards using real-world datasets. Strong foundation in statistics, data preprocessing, and visualization with a keen interest in applying ML techniques to solve practical business problems.

EDUCATION

J D College of Engineering & Management

BTech in CSE (Data Science)

2022 - Present

CGPA – 8.1

Pandit Bachharaj Vyas Vidyalaya and Junior College

HSC Board

2019-2021

90.33%

Sanjuba High School

SSC Board

2019

87.66%

PROJECTS

Risk Analysis in Banking

- Built an **interactive Banking Dashboard in Power BI** to monitor deposits, loans, customer growth, and revenue performance.
- Designed **data models and DAX measures** enabling drill-down analysis, forecasting, and customer segmentation.
- Delivered **actionable insights on branch performance and risk trends**, improving financial planning and decision-making.
- **Technologies** : Python, Statistics, MySQL, Power BI | [GitHub](#)

Movie-Recommendation System using Machine Learning

- Developed a **content-based recommendation system** to suggest movies based on user preferences.
- Processed and transformed movie metadata using **TF-IDF Vectorization** to capture textual similarities.
- Implemented **Cosine Similarity** to measure closeness between movies and generate personalized recommendations.
- **Technologies**: Python, NumPy, Pandas, Scikit-learn | [GitHub](#)

Diabetes Prediction using Machine Learning

- Built a **predictive model** to classify patients as diabetic or non-diabetic using health parameters from the Pima Indians dataset.
- Applied **data preprocessing and feature scaling (StandardScaler)** to improve model performance.
- Implemented a **Support Vector Machine (SVM)** classifier and evaluated performance with train-test split and accuracy score.
- Achieved a **robust model for binary classification**, supporting early disease detection.
- **Technologies**: Python, NumPy, Pandas, Scikit-learn, Statistics, Machine Learning (SVM, Classification) | [GitHub](#)

SKILLS

Programming Languages: Python, MySQL

Libraries: Pandas, Matplotlib, Seaborn, Scikit-learn

Data Visualization: Excel, Power BI

Machine Learning

- Classification: Binary Classification, Support Vector Machine (SVM), Decision Tree
- Regression: Linear Regression, Logistic Regression
- Clustering: K-Means

Soft Skills: Communication, Teamwork, Leadership

CERTIFICATIONS

- Joy of Computing Using Python- [NPTEL, IIT Kanpur](#)
- Introduction to Data Analytics- [Coursera, IBM](#)
- Enhancing Soft Skills and Personality- [NPTEL, IIT Kanpur](#)
- Professional Project Management- [Coursera, Google](#)
