

Rahul Garg — React.js Developer

📞 +91 7849881366 • ✉ rahulaggarwal31090@gmail.com

Profile

Motivated and detail-oriented **React.js Developer** with hands-on experience in building responsive, component-based web applications using **React.js**, **JavaScript (ES6+)**, and modern UI practices. Skilled in API integration, state management using React Hooks, localStorage persistence, routing, and performance optimization. Passionate about creating scalable, reusable, and user-friendly applications with clean architecture and maintainable code.

Education

Lords International College, Alwar

Bachelor of Computer Applications (BCA)

Aug 2023 – May 2026

Floyam Senior Secondary School, Alwar

10th & 12th (RBSE Board)

2020 – 2023

Experience

Algrowthm — Remote

React.js Developer Intern

15 Sep 2025 – 15 Nov 2025

- Developed a 12-page responsive company website using **React.js** and **Tailwind CSS**.
- Implemented **React Router** for client-side routing and modular component architecture.
- Managed UI interactivity using **useState**, **useEffect**, **useRef**.
- Applied mobile-first responsive design and performance optimization techniques.
- Improved user experience with reusable components and structured folder architecture.

CodSoft — Remote

Frontend Developer Intern

Jul 2025 – Aug 2025

- Built responsive applications including Portfolio, Calculator, and Quiz App.
- Strengthened fundamentals of **JavaScript**, **DOM Manipulation**, and **UI design**.
- Practiced version control using **Git** and **GitHub**.

Projects

Mini E-Commerce Application (React): Tech: *React.js, JavaScript, FakeStore API, React Router*

Built a dynamic e-commerce SPA with product listing, category filtering, price sorting, cart management, and localStorage persistence. Implemented quantity control (+/-), state lifting, reusable components, and responsive UI design.

Todo List Application (React): Tech: *React.js, useState, LocalStorage*

Developed a task management app with add/delete functionality, state updates, controlled inputs, and data persistence across page refresh using localStorage.

Weather Application (API Integration): Tech: *React.js, OpenWeather API*

Integrated real-world API to fetch live weather data. Handled loading states, error handling, dynamic UI updates, and conditional rendering.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks / Libraries: React.js, React Router, Tailwind CSS, Bootstrap

Core React Concepts: Hooks (useState, useEffect), Component Architecture, Props, Conditional Rendering, State Management, API Integration, LocalStorage, SPA

Tools: Git, GitHub, VS Code, Netlify, Vercel

Core Skills: Responsive Web Design, REST API Handling, Debugging, Performance Optimization, Cross-Browser Compatibility
