

AMAN SELWARIA

A dedicated and innovative Computer Science student seeking internship opportunity to apply my skills in Java, C++, Data Analytics, and Web Development. Passionate about problem solving and eager to contribute to real-world projects while learning and growing.

EDUCATION

2022-2026

Avantika University

B.tech (C.S.)

SKILLS

- Critical Thinking
- Programming Languages: Java, C++ (Basics)
- Web Development: HTML, CSS, JavaScript
- Data Analytics: SQL, Tableau, Excel
- Internet of Things (IoT): Sensors and Modules Integration

CERTIFICATION

- Data Analytics Essentials (NetAcad, Cisco).
- Internet of Things 201 (Oct 2024).
- Java Servlets Training (Mar 2025).
- Data Analytics Essentials (NetAcad, Cisco).
- Internet of Things 201 (Oct 2024).
- Java Spring Boot - Advance (Mar 2025).

LANGUAGES

- Hindi (Fluent)
- English (Fluent)

PROJECTS

Java-Based Plain Text Editor

- Developed a feature-rich desktop text editor using Java for both front-end and back-end development.
- Introduced a real-time font preview panel, allowing users to view font changes without selecting text—enhancing usability compared to conventional text editors.
- Ensured cross-platform compatibility—runs seamlessly on any machine with SQL Workbench and Spring Boot Tool Suite installed.
- Presented research findings at a National Conference, leading to the publication of a research article.

Version Migration of Java Web Application

- Migrated a Java-based web application from Java 8 to Java 21 to ensure compatibility and continued support.
- Upgraded Apache Tomcat Server from version 8.5 to 10, improving security and performance.
- Updated Servlet versions, JAR dependencies, CSS, SCSS, JavaScript, and other libraries to align with modern development standards.
- Ensured the upgraded application remains fully functional across different environments, requiring only SQL and Spring Boot Tool Suite for execution.
- Optimized legacy code, resolved compatibility issues, and improved application efficiency.

Machine Learning Dataset Creation and Training

- Designed and trained custom ML models for analyzing cow and cow milk data with 70% training accuracy.
- Developed a predictive model for future milk production estimation, milk quality assessment, and price prediction using Linear Regression and other regression techniques.
- Plotted graphs and visualizations to analyze predictions and trends effectively.
- Curated a dataset from reliable sources like Sachi, Mother Dairy, Amul, and government websites to ensure accuracy.
- Applied data preprocessing, feature engineering, and hyperparameter tuning to enhance model performance.

IoT-Based Smart Bird Feeder

- Engineered an IoT-powered bird feeder using sensors like load cell, mist sensor, PIR sensor, and Arduino Uno.
- Integrated ESP32 for long-distance wireless connectivity and real-time data monitoring.
- Designed to automate bird feeding in zoos and sanctuaries, addressing the common issue where caretakers may forget to feed birds or face difficulties in manual feeding.
- Optimized food distribution and water quality monitoring to ensure proper nourishment and well-being of birds.

INTERESTS

- IoT-based projects for smart automation.
- Driven to do new research, offer fresh approaches to issues, and study emerging technologies.
- AI and automation technologies.
