Dehradun Uttarakhand

EDUCATION

12TH FROM BSEB (2017-19)

RSS INTER COLLAGE, CHOCHAHAN,
MUZAFFARPUR BIHAR

B.TECH(EEE)

JIGYASA UNIVERSITY DEHRADUN
(FORMER HIMGIRI ZEE UNIVERSITY
DEHRADUN)

2021-2025

SKILLS

- MS office (Excel, Word & power point)
- power BI(basic)
- Python(basic)
- photography
- communication skills

MY HOBBY

- Games
- Video editing
- Traveling

ABOUT ME

I am Rishi Raj, a final semester B.Tech student in Electrical and Electronics Engineering at Jigyasha University. With a strong foundation in electrical systems, circuit design, and project development, I am passionate about applying engineering principles to solve real-world challenges. Throughout my academic journey, I have worked on innovative projects like solar energy systems, laser security alarms, and sound-to-electricity conversion systems.

WORK EXPERIENCE

PROJECT NAME- CONVERSION OF SOUND WAVE TO ELECTRICAL

- LED Symbol
- SolarPanel
- Test of solar panel
- Resistor
- p-n+ junction
- Anode , Cathode
- Load resistor, Voltage, Current

ENGINEERING PROJECTS

LASER SECURITY ALARM SYSTEM

The core objective of this project is to design a laser security system with laser and light-dependent resistors,

The design of the laser security system circuit.

The circuit, construction and setup for the Laser Security System. If used with a battery, the laser security system can work even when there is a power outage.

Laser Security System can be used in safety lockers in our homes, where even if the locker's code is hacked, it acts as an additional layer of security.
