Education

J D College of engineering and management, Nagpur

Expected 2026

B.tech Information Technology

CGPA: 9.78/10

Shri Dnyanesh mahavidhyalaya, Nawargaon

2021

XII (HSC), Maharashtra Board

90.17%

Bharat vidhyalaya, Nawargaon

2019

X (SSC), Maharashtra Board

91%

Technical Skills

Languages: Python, SQL, MongoDB, C, HTML, CSS, JavaScript, Java

Developer Tools: VS Code, Jupyter notebook, Eclipse, Tableau, PowerBI

Technologies/Frameworks: Linux, GitHub, Git

Internships

- Zscalar NETWORKING VIRTUAL INTERNSHIP (July-Sept 2024)
- PALO ALTO CYBER SECURITY VIRTUAL INTERNSHIP (April-June 2024)

Projects

Retail Sales Analytics System | *Python, Machine Learning, Tableau*

- Developed an end-to-end retail analytics pipeline using Python (Pandas, NumPy) and Scikit-learn to analyze Walmart sales data.
- Performed data cleaning, feature engineering, and EDA to identify sales patterns, top-performing stores, and seasonal trends.
- Built a Random Forest forecasting model for weekly sales prediction.
- Designed an interactive Tableau dashboard showcasing KPIs such as store performance, department insights, and holiday impact.

Cybercrime Analytics Dashboard | *Python, MongoDB, Tableau*

- Built a complete analytics workflow integrating MongoDB, Python, and Tableau to analyze 1,000+ cybercrime records across India.
- Cleaned and exported data from MongoDB using Pandas, enabling smooth visualization.
- Created an interactive Tableau dashboard including crime-type distribution, financial loss analysis, gender trends, monthly patterns, and state-wise geospatial maps.
- Strengthened insights into cybercrime patterns for reporting and decision-making.

Fraud detection project | *Machine Learning*

- Built ML models (Logistic Regression, Decision Trees, Random Forest) to classify transactions as fraudulent or genuine, with strong precision and recall.
- Applied data preprocessing, feature engineering, and evaluation metrics (ROC, F1-score) to enhance accuracy and interpretability.

Certifications

Data Analytics: Delloite

Python Computing: NPTEL

Ethical Hacking : INTERNSHALA
