SUMMARY

I am skilled in data cleaning, transformation, analysis, and visualization. Proficient in tools like Excel, Power BI, Tableau, and Python (Pandas, NumPy, Matplotlib, Seaborn). Experience in uncovering actionable insights to drive business decisions. Adept at leveraging Analytical tools for data analysis. Passionate about solving data challenges to deliver impactful solutions.

SKILLS

- **Data Analysis:** Microsoft Excel, Google Sheets.
- **Visualization Tools:** Power BI, Tableau.
- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL(MySQL)
- **Data Analysis:** Skilled in utilizing data analysis. (using POWER BI ,PYTHON)
- **Machine Learning:** Basics of Machine Learning.

PROJECTS

1.Screen Time Analysis Dashboard

[View Project](#)

Self-initiated Project | Power BI

- Designed and developed an interactive Power BI dashboard to analyse personal or aggregated screen time data across various apps.
- Imported, cleaned, and transformed raw usage data (minutes, app opens, notifications) using Power Query and DAX functions.
- Created visualizations to display daily usage trends, most used apps, notification frequency, and time-of-day engagement.
- Enabled insights into digital habits and time management patterns using slicers and custom measures.

2.Web Scrapping Project

[View Project](#)

Self-initiated Project | Python Analysis

- Developed a Python-based web scraping tool to extract real-time weather forecast data from a public weather website.
- Implemented user input functionality allowing users to enter any Indian city name to fetch location-specific weather forecasts.
- Utilized libraries such as requests, BeautifulSoup, and pandas to scrape, parse, and structure the data.
- Automated the process to save the extracted data into a CSV file, enabling easy offline access and further analysis.
- Focused on clean code, error handling for invalid city inputs, and user-friendly output display in terminal and file format.

3.Spam Message Detection Project

[View Project](#)

Self-initiated Project | Machine Learning

- Developed a machine learning model to classify emails/messages as *spam* or *ham* using Natural Language Processing (NLP) techniques.
- Cleaned and preprocessed text data by removing stopwords, punctuation, and performing tokenization and TF-IDF vectorization.
- Achieved accuracy of over 95% with strong recall and precision, ensuring minimal false positives in spam identification.
- Strengthened understanding of NLP workflows, model evaluation metrics.

EDUCATION

- **Master Of Computer Applications**
D.Y.Patil Institute of Master of Computer Application and Management, Akurdi, Pune. 2023-2025
- **Bachelor's in Computer Application**
Shardabai Pawar Mahila Mahavidyalay, Sharda Nagar , Baramati. 2020-2023

CERTIFICATES

- **Data Analysis With Python-IBM** [View Certificate](#)
Gained proficiency in Python programming, data manipulation using Pandas and NumPy, and applied core data science techniques.
- **Python for Data Science– IBM** [View Certificate](#)
Acquired skills in exploratory data analysis, data cleaning, and data visualization using libraries like Matplotlib and Seaborn.
- **Python With Machine Learning– IBM** [View Certificate](#)
Acquired essential SQL skills for data science, including data querying, filtering, aggregation, and joins through hands-on training .
- **Master's in data science and Analytics With Artificial Intelligence -IT Vedant** (Certification Course) [View Certificate](#)

LANGUAGE

- English, Hindi, Marathi
