

Soniya Nishad

(Full Stack Java Developer)

soniyanishad10@gmail.com 7397967845 LinkedIn: www.linkedin.com/in/soniyanishad GitHub: github.com/soniyanishad

SUMMARY

Java Full Stack Developer with hands-on skills in Java, Spring Boot, React, and MySQL. Experienced in developing scalable, real-world full-stack applications with clean architecture and responsive UI. Strong understanding of RESTful APIs, MVC, and frontend/backend integration. Eager to contribute to a collaborative, fast-paced development team.

PROJECTS

ZIDIOConnect – Online Job Portal (Technologies: Java, Spring Boot, JDBC, MySQL, HTML, CSS, JavaScript)

- Developed role-based modules for Admin, Recruiter, and Student with distinct access and functionality.
- Implemented key features like job posting, application tracking, resume upload, and status updates for applicants.
- Built secure and scalable REST APIs using Spring Boot, and integrated them with dynamic frontend using HTML/CSS/JS.
- Used JDBC and core Java for handling backend business logic and database operations with MySQL.

Banking Management System (Technologies: Java, Spring Boot, React, MySQL)

- Implemented user authentication with Spring Security
- Developed REST APIs for transaction and account management
- Designed responsive frontend using React
- Used MySQL and JPA for data persistence

Real-Time Chat System (Technologies: Java, Socket Programming, Multithreading)

- Built a client-server chat app with real-time message exchange
- Used Java sockets and threads to handle multiple clients simultaneously

QR Code Generator (Technologies: HTML, CSS, JavaScript)

- Generated QR codes from user input using an API
- Enabled users to download the generated QR image

Bubble Shooter Game (Technologies: HTML, CSS, JavaScript)

- Developed a reflex-based bubble clicking game
- Used DOM manipulation and timer-based scoring system

Jan 2025-Present **CETPA Infotech pvt.. ltd.**
Trainee

NOIDA, UP

- Developed full-stack applications using Java, Spring Boot, and React
- Built RESTful APIs, designed UI components, and worked with MySQL
