Professional Summary

Detail-oriented Data Analyst with expertise in Python, SQL, and advanced visualization tools including Power BI and Tableau. Experienced in building dashboards, analyzing complex datasets, and documenting structured workflows. Recently completed a Data Science and AI Master's program. Skilled in collaborating with large language models (LLMs), simulating real-world digital workflows, and producing step-by-step instructions for automation. Seeking a role in data annotation and digital task automation to contribute to the advancement of AI technologies.

Technical & Professional Skills

- Tools & Platforms: Power BI, Tableau, Excel, Notepad, Google Forms, Slack, Canva, Microsoft Word, Dropbox, Zoom
- Programming: Python, SQL
- Data Handling: Data Cleaning, Data Wrangling, Workflow Documentation, Data Annotation
- Soft Skills: Attention to Detail, Critical Thinking, Independent Working, Structured Documentation

Education

Master in Data Science & Analytics with AI, IT Vedant Education Pvt. Ltd. (Sep 2024 – Present)
PG Diploma in Dietetics & Nutrition, Symbiosis Skills & Professional University – 2021
MSc in Mathematics, Vikram University, Ujjain – 2002
BSc in Computer Science, Holkar Science College, Indore – 1999
SSC, Lokmanya Tilak School, Ujjain – 1996

Work Experience

Clinical Nutritionist | FITIPQI (Mar 2023 – Dec 2023)

- Evaluated patients' dietary habits and medical history.
- Developed personalized meal plans for conditions like diabetes, obesity, heart disease.
- Monitored dietary compliance and nutrient intake.

Projects & Relevant Experience

Metabolic Syndrome Analysis – Power BI

- Built an interactive dashboard analyzing physiological data and trends.
- Reduced load time by 40%, enhancing reporting speed and efficiency.
- Annotated workflows with charts, maps, and narrative summaries.

Police Fatalities Dashboard – Power BI

- Created a 5-year trend dashboard with various visualization tools.
- Reduced data load time by 30% and improved insight delivery.

Product Sales Analysis – Excel

- Conducted data analysis using PivotTables and slicers.
- Documented analysis steps and presented sales trends visually.

Digital Task Simulation (Independent)

- Practiced simulating user tasks and documenting workflows across tools like Google Forms, Notepad, Canva, and Slack.
- Developed SOPs and clear prompt-based instructions for task automation and annotation.
