

EDUCATION

Vellore Institute of Technology – AP  
Bachelors in computer science; GPA: 7.98

Vijayawada, India  
Aug 2023 – May 2027 (Expected)

Narayana E-Techno School  
CBSE – Class 5<sup>th</sup> to 12<sup>th</sup>

Bengaluru, India  
May 2015 – May 2023

SKILLS SUMMARY

- **Languages:** Python, SQL, JAVA
- **Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn (basics)
- **Tools:** Power BI, Excel, PowerPoint, Tableau, MySQL
- **Platforms:** Google Colab, Jupyter Notebook, Visual Studio Code
- **Soft Skills:** Stakeholder Management, Rapport Building, Team Collaboration, Communication

WORK EXPERIENCE

1. [Data Analyst Intern | Prodigy InfoTech](#) | [Link](#)

March 25 - March 25

  - Conducted data analysis and visualization projects using Python and Excel.
  - Applied machine learning techniques to extract meaningful insights from datasets.
  - Worked on data cleaning, preprocessing, and statistical analysis.
2. [Cricket Analytics Workshop | Mad About Sports](#) | [Link](#)

March 25 - April 25

  - A workshop focusing on sports performance analytics.
  - Analyzed cricket match data for performance improvement.
  - Learned key metrics used in cricket analytics and predictive modeling.
3. [Data Analyst Intern | Arham World](#) | [Link](#)

August 25 – November 25

  - Generated and qualified over 500 leads for the Education Wing through targeted market research and data cleaning in Google Sheets. Applied machine learning techniques to extract meaningful insights from datasets.
  - Designed and built an interactive dashboard with pivot tables, charts, and slicers to visualize and analyze lead generation data.

PROJECTS

- SRH IPL Cricket Stats Dashboard | [Blog Link](#)

May 2025 – Jun 2025
- Tools Used: Python, Pandas, Seaborn, Matplotlib, GitHub

  - Developed an end-to-end data analysis project focused on Sunrisers Hyderabad using IPL ball-by-ball data.
  - Performed extensive data cleaning, transformation, and exploration using Pandas and NumPy.
  - Visualized player stats, dismissal types, season-wise trends, and opponent-wise performance using Seaborn and Matplotlib.
  - Created custom plots and annotated visuals to highlight top performers and patterns across seasons.
  - Documented insights in a blog post on Hash node and uploaded all code and results to GitHub for public access.

CERTIFICATES

1. Getting Started with Microsoft Excel – Coursera Project Network [CERTIFICATE](#)

  - Strengthened skills in spreadsheet navigation, data entry, and formula-based analysis.
  - Achieved 100% score and applied Excel for data organization and decision-making.
2. Introduction to Data Science Job Simulation – Commonwealth Bank (Forage) [CERTIFICATE](#)

  - Developed pipelines for data aggregation and anonymization.
  - Proposed effective social media analysis strategies and database designs for insights.
