YASH UPADHYAY

PROFILE

Enthusiastic Web Developer with practical experience in C++, HTML, CSS, JavaScript, React, and Power BI. Skilled in building small web applications and interactive dashboards while continuously improving coding and problem-solving skills. Participated in hackathons and team projects, demonstrating eagerness to learn, collaborate, and deliver results.

KEY ACHIEVEMENTS

- Event Management Lead, GDG on Campus – Avantika University: Directed planning and execution of developer community events to enhance engagement and foster technical growth.
- Top 15 finalist in an AWS-promoted Hackathon in Dehradun with team collaboration and tech innovation.
- Completed a 36-hour hackathon at ADIT College, CVM University, developing innovative tech solutions while honing coding, teamwork, and problem-solving skills.

WEB DEVELOPMENT INTERN

Cognifyz Technologies | Jul 2025

- Built and enhanced web projects using modern web development tools.
- Collaborated with a remote team to deliver timely and efficient project solutions.
- Contributed to improving user experience and optimizing web functionalities.

PROJECTS

Weather Forecast App

- Built a weather application using React.js and the OpenWeather API. It includes a city-based search feature to display real-time weather updates. The app also shows temperature, humidity.

AI Chat Application

- Developed an interactive AI-powered chat app using React.js and OpenAI API for real-time conversational responses. Implemented state management and responsive design for a smooth user experience.

Expense Tracker

- Created a responsive expense tracker that allows users to add income and expenses, calculates real-time balance, and saves data locally for persistence.
