Professional Summary

Computer Engineering student focused on full-stack development and machine learning. Experienced in building predictive models, interactive dashboards, and scalable web applications. Skilled in translating technical requirements into efficient, user-focused solutions.

Education

Fr. Conceicao Rodrigues College of Engineering - B.E. Computer Engineering (2023–2027) | CGPA: 8.61 / 10

Prakash Vidyalaya & Junior College - HSC (2021–2023) | 72.67%

Holy Cross Convent School - SSC (2011–2021) | 94.40%

Technical Skills

Languages: Java, Python, JavaScript, C

Web: HTML, CSS, React, Node.js

Databases: MySQL, PostgreSQL (Neon)

Tools: Power BI, MS Excel, VS Code, GitHub, XAMPP

Concepts: OOP, Data Structures, Predictive Modeling, REST APIs

Projects

AI vs Real Image Predictor-Built a CNN model on 5,000+ images achieving 90%+ accuracy using data augmentation and validation metrics.

Student Dropout Prediction System-Developed a predictive model on 3,000+ records with 90% accuracy .

WasteLens – AI Waste Classification - Designed an AI platform to classify waste materials and support recycling and monitoring workflows.

Marine Biodiversity Monitoring Website - Developed a responsive website with interactive visualizations for tracking species and pollution indicators.

Certifications

Java Spring Framework - Simplilearn | Data Analytics Job Simulation - Deloitte Australia (Forage) | Software Engineering Job Simulation - Accenture Nordics (Forage)

Extracurricular Experience

School Teaching Program (One Semester) -Taught 30+ students weekly with a team of ten, created activity-based learning modules, and strengthened leadership and communication skills.

Soft Skills

Communication, Teamwork, Leadership, Problem-Solving, Time Management, Adaptability, Critical Thinking.
