C++ | HTML | CSS | Python | Machine Learning | JavaScript | NodeJS | React | MongoDB | Blockchain | Solidity | MySQL | Git

Work Experience

Full Stack Web Development Intern – Apex Planet PVT LTD

May 2025 – July 2025

- Developed a dynamic full-stack web application with AI-powered features using the MERN stack.
- Integrated machine learning APIs to automate intelligent content suggestions and enhance user interaction.
- Deployed REST APIs with Node.js and MongoDB, ensuring optimized backend performance.

Projects

Online Voting System Using Blockchain

(Aug 2024)

- A Kickstarter-style decentralized web app using Solidity and React.js to reduce voting fraud via smart contracts.
- Ensured transparent, tamper-proof voting records through blockchain transaction logs.

YelpCamp

(Oct 2024)

- Full-stack campground listing platform built with Node.js, Express.js, MongoDB, and EJS.
- Integrated Mapbox for real-time geolocation and Cloudinary for secure image hosting.
- Enabled authentication with Passport.js and followed MVC architecture for clean, modular code.

Academic and Extracurricular Achievements

- Top 20 out of 1000 teams – *Hackemon by She Builds, Galgotia University*
- Top 5 – *Capstone Project, IIT Patna*
- Global Rank 622/13,985 – *LeetCode Weekly Contest 202*

Positions of Responsibility

Circle Head – Mushkurahat Foundation

(Dec 2024 – Jan 2025)

- Led crowdfunding initiatives for orphan and disabled children.

Teacher

- Conducted offline web development sessions for junior students.
