Nagpur

SUMMARY

I'm a passionate and fast-learning web developer with hands-on experience in HTML, CSS, JavaScript, and React. I've built several personal projects that reflect my ability to turn ideas into interactive, user-friendly websites. I'm also familiar with backend technologies like Node.js and MongoDB, making me comfortable working across the full stack. I'm a strong team player, eager to contribute, learn from real-world challenges.

EXPERIENCE

EDUCATION

B.Tech And Electronics and Telecommunication

Rashtrasant tukdoji maharaj nagpur university

2023 - 2027

KEY ACHIEVEMENTS

Hackathons

Hackathon Participation

Participated in multiple college-level and intercollege hackathons focused on web development and problem-solving. Collaborated in teams to develop innovative solutions under time constraints, including projects like interactive quiz games and EcoSwap – a sustainable item swapping platform.

SKILLS

Frontend, Javascript, SQL, React.js

Node.js, Express.js, Firebase

CERTIFICATION

Frontend Workshop

SQL Training

PROJECTS

Kanban Board

Date period

Location

Kanban Task Management App

HTML, CSS, JavaScript, React

Built a responsive Kanban-style task management application allowing users to create, update, drag and drop tasks across columns (To Do, In Progress, Done). Implemented component-based architecture with React and managed dynamic state for real-time task updates.

• .

Ecoswap

Date period

Location

EcoSwap – Sustainable Swapping Platform HTML, CSS, JavaScript, React, Node.js Developed a web platform that enables users to swap or donate used items to promote sustainability. Implemented item listing, category filtering, and user interaction features using React for frontend and Node.js for backend logic
