EDUCATION

Rungta College of Engineering and Technology
B.Tech in Information Technology | CGPA : 7.0

Chhattisgarh, India
2022-2026

EXPERIENCE

Cognifyz Technologies

Remote

Web Development Intern

June 2025 - July 2025

- Contributed to 3 real-time projects, integrating basic backend features to improve functionality by 20%
- Collaborated with team members to integrate REST APIs and resolve functional issues.
- Assisted in debugging, troubleshooting, and maintaining backend services in a production-like environment.

Data Structure and Algorithm Vocational Training

Chhattisgarh, India

Coding Spoon

Aug 2024 - Sep 2024

- Completed intensive training in core data structures (*arrays, Stacks, Queue, linked lists, trees*) and algorithms (sorting, searching, recursion, dynamic programming).
- Solved 250+ coding problems on [GeeksforGeeks](#) and [LeetCode](#), strengthening problem solving efficiency

PROJECTS

Vingo (Online Food & Delivery Platform) -React.js, Node.js, MongoDB, Express.js, REST APIs

[Github](#) | [Link](#)

- Architected a **three-tier** logistics platform (*Customer, Shop Owner, Delivery Partner*) with role-based authentication and authorization, supporting *100+ users, 50+ shops, and 50+ orders*.
- Developed responsive frontend dashboards and scalable REST APIs for shop management, order processing, and delivery assignment.
- Implemented **real-time order tracking** using Leaflet + OpenStreetMap with **live location updates** and synchronized order status across clients.
- Designed **map-based checkout**, complete *order lifecycle workflows*, and *database-driven transactions* ensuring *99% data consistency*, improved delivery efficiency by **30%**

AI Support – Embeddable AI Customer Support Platform - Next.js, MongoDB, ScaleKit

[Live Demo](#)

- Built an embeddable AI support chatbot using *Next.js, MongoDB, authenticated dashboards* with *Scalekit*
- Implemented CI/CD pipeline by integrating GitHub with **Vercel**, enabling automated build and deployment on every code commit
- Designed a **one-line embeddable JavaScript widget**, reducing chatbot integration time to under **2 minutes** per website
- Delivered fast, scalable AI responses nearly (1s latency) using serverless APIs deployed on Vercel

Online Voting System — React.js, Node.js, MySQL

- Engineered a secure full-stack online election platform supporting 200+ users with **role-based access control (Admin/Voter)** and protected authentication flows.
- Designed and implemented **RESTful APIs with structured JSON payload processing**, authorization middleware, and database-driven vote management workflows.
- Ensured data integrity using relational schema design, constraints, and transaction-safe operations to prevent duplicate or unauthorized voting.

COMPETENCIES

- Languages: Java, Python, JavaScript, SQL
- Frameworks & Tools: Node.js, Express.js, React.js, MongoDB, AWS, REST APIs, Git, Spring, Version Control
- CS Fundamentals : OOPs, DBMS, Computer Networks, Operating Systems
- Additional Exposure: Enterprise Application Basics, Secure Systems Design, PyTorch

CERTIFICATIONS & PROFILES

- AWS Cloud - [Certification](#)
- Responsive Web Design by FreeCodeCamp - Certification
- GeekforGeeks : 200+ Coding Practice - [Profile](#) | LeetCode :150+ problem Solving- [View Leaderboard](#)
