Summary

Highly motivated IT fresher Proficient in programming languages such as Java, C and C++, and skilled in web development frameworks (HTML, CSS, JavaScript) and database management (SQL, MySQL). Strong communicator with the ability to collaborate across teams and adapt quickly to new technologies. Dedicated to continuous learning, innovation, and delivering solutions that improve business processes. Seeking to leverage technical skills and passion for IT to drive success in software development, IT support, system administration, or network management roles.

Skills

Frontend

- HTML
- CSS
- JavaScript

Backend

- C
- C++
- Java
- PHP
- SQL

Education

2020/02 – 2024/07

Nagpur, India

B.Tech in Electronic and telecommunication

Yeshwantrao Chavan College of Engineering (YCCE), Nagpur

2018 – 2020

Nagpur, India

Higher secondary education

Taywade College, Mahadula-Koradi

Projects

SOLAR BASED WIRELESS ELECTRIC VEHICLE CHARGING STATION

This project aims to design and implement a sustainable and efficient wireless charging station for electric vehicles (EVs) powered by solar energy. The system integrates photovoltaic (PV) panels to harness solar energy and convert it into electricity. This electricity is then utilized to wirelessly charge EVs using resonant inductive coupling technology. The proposed system promotes green energy adoption and supports the growth of the EV industry by addressing charging infrastructure challenges.

Internship

2024/01 – 2024/05

Maharashtra Remote
Sensing Applications
Centre, Nagpur, India

Urbanization in an area using Deep learning/Machine learning

During my internship, I contributed to a project focused on analyzing urbanization patterns in a specific area using deep learning and machine learning techniques. My responsibilities included collecting and preprocessing geospatial and satellite data, implementing models for land-use classification, and predicting urban growth trends. I employed tools such as TensorFlow, and GIS software to design and train neural networks for accurate detection of urban areas. Additionally, I collaborated with a multidisciplinary team to interpret results and provide actionable insights for urban planning. This experience enhanced my technical skills in artificial intelligence and my understanding of sustainable development strategies.
