PROFESSIONAL SUMMARY

Aspiring Python developer interested in backend technologies. Enthusiastic about building efficient backends and integrating machine learning with Python. Adaptable, eager to learn, and passionate about using technology to solve real-world problems. Brings a hands-on approach, strong collaboration, and a drive for clean, reliable code.

EDUCATION

- G. H. Rasoni College of Engineering, Nagpur** 2026
Btech. Artificial Intelligence CGPA: 8.59
- VMV Commerce JMT Arts & JJP Science College** 2022
Maharashtra State Board of Secondary and Higher Education, Pune Percentage: 73.50%

INTERNSHIP

- Elevate Labs** June 2025 – July 2025
Python Developer Intern Remote
 - Technologies Used: Flask, FastAPI, Postman, Bootstrap.
 - Contributed to the design and development of backend services using Flask and FastAPI, focusing on creating efficient, scalable REST APIs. Gained practical experience in Python application development, API integrations, and building modular code structures. This hands-on role deepened understanding of modern development workflows, improved debugging skills, and reinforced best practices in writing clean and maintainable Python code.

PERSONAL PROJECTS

- Health Blog Portal | [GitHub](#)** Sept 2025
 - Technologies Used: Python, Django, MySQL, Bootstrap, HTML, CSS,
 - Developed a role-based portal with doctor/patient dashboards, secure authentication, and a full-featured health blog (category-based authoring and patient access).
 - Implemented responsive UI, media handling, and production-grade database with robust admin controls.
- Bookstore Inventory Management API | [GitHub](#)** June 2025 - July 2025
 - Technologies Used: Python, FastAPI, SQLite, SQLAlchemy, Postman.
 - Built a RESTful API to manage bookstore inventory with full CRUD features, robust error handling, and advanced search/filtering. Integrated SQLite via SQLAlchemy, thoroughly tested and documented endpoints using Postman. Strengthened backend development and API documentation skills.
- Image Processing/Editor Tool | [GitHub](#)** Jan 2025 - Feb 2025
 - Technologies Used: Python, Flask, Pillow, OpenCV.
 - Built a Python-based tool for batch image processing with features like resizing, format conversion, compression, and basic computer vision operations. Used os for folder traversal and integrated Pillow and OpenCV for efficient image manipulation. Designed to streamline bulk image tasks with automated and customizable workflows.

TECHNICAL SKILL AND INTEREST

Languages: Python, C++, C

Developer Tools: Postman, GitHub, VS Code

Databases: SQL

Soft Skills: Creativity, Planning & Delivery, Communication, Team Leadership, Patience

Areas of Interest: Research and Analysis, Python Development, Backend Development, Artificial Intelligence & Machine learning, Computer Vision.

POSITION OF RESPONSIBILITY

- Secretary**, IEEE Computational Intelligence Society, GHRCE Sept 2024 - Sept 2025
- Ex - Volunteer**, IEEE Computational Intelligence Society, GHRCE 2023-2024

CERTIFICATIONS

- C, C++ Certifications** from Disha Computer institute (Securing 90+% in final assessment)

ACHIEVEMENTS

- Participation in SIH** 2023, 2024
- Winner**, Biomedical Hackathon organized by GHRCE, Nagpur 2022
