SUMMARY

Passionate and motivated person with a keen interest in all areas of technology, including software, web, and mobile application development. Curious and adaptable, with a strong drive to explore emerging tools, learn continuously, and contribute innovative, user-focused solutions. Dedicated to growing as a versatile developer while making a meaningful impact through technology.

PROJECTS

- **E-Commerce Mobile Application**

Developed a mobile e-commerce application that enables shop owners to register their store with location details and manage their business digitally. The app allows owners to update shop information, add or remove products, and track orders with location details. Customers can browse available stores and use location-based filters to find shops nearest to them, whether home-based or physical stores.

- **Web-Based Communication Platform**

Built a web communication platform with room-based chat functionality, allowing users to create and join rooms for real-time interaction. Designed for simplicity, smooth performance, and user-friendly communication.

- **Hire-Artist Platform**

Developed a platform for musical artists to showcase their talent by creating and managing profiles with photos, videos, and editable details. Users can search and filter artists based on skills, making it easier to discover and connect with performers.

EDUCATION

Diploma in Information Technology

Gujarat Technological University, GP Gandhinagar
