PROFILE

- Data Analyst with hands-on experience in **Power BI, SQL, Tableau, and Excel**.
- Developed **interactive dashboards** to simplify data visualization and enhance **decision-making processes**.
- Proficient in writing **SQL queries** for **data extraction**, transformation, and analysis.
- Skilled in **data cleaning** and transformation to ensure accuracy and consistency in analysis.
- Created actionable reports and insights for stakeholders, driving **data-driven decisions**.
- Utilized **Advanced Excel** functions and **DAX** for performance analysis and creating dynamic visualizations.
- **Strong background in data-focused tasks**, stakeholder collaboration, and ability to take ownership of tasks.

SKILLS

- | | | | |
|----------------------------------|-------------------------|------------------------|-----------------------|
| • Power BI | • Tableau | • Data Visualization | • Data Modeling |
| • SQL | • Data Extraction | • Advanced Excel | • Excel Pivot Table |
| • Data Cleaning | • ETL | • Competitive Analysis | • Predictive Analysis |
| • Python | • Market Trend Analysis | • SAP | • Power Point |
| • Communication (Verbal/Written) | | | |

PROFESSIONAL EXPERIENCE

- Data Analyst & Manufacturing Support, S M Auto.** Aug 2022 – Sep 2024 | Pune
- Designed and developed **Power BI dashboards** with advanced **DAX** functions, created custom visuals, **KPI**, and interactive filters. Enabled **data-driven decisions** by visual insights below
 - Total Sheet metal consumption Grade & thickness wise (To plan procurement & reorders)
 - Weld Wire, Welding gas consumption benchmarks
 - Assembly line defect & its causes analysis with visuals to make an action plan.
 - Used basic **DAX function** to create custom **measures** such as material consumption grade & Thk.-wise.
 - Delivered actionable insights through detailed reports, dashboards, and **visualizations**.
 - Leveraged Advanced Excel features (**VLOOKUP, INDEX-MATCH, pivot tables**) for streamlined data analysis.
 - Conducted **data cleaning** and validation to ensure dataset accuracy for analytics and reporting.
- Asst. Manager Product & Process Development, S M Auto** Oct 2018 – Aug 2022 | Pune
- Conducted data-driven feasibility analysis for New Product Development, optimizing manufacturing processes & collaborating with stakeholders.
 - Successfully led multiple projects from initial feasibility and product/process validation through to final handover for plant production, ensuring timely and smooth launches.
- QA / QC Lead Engineer, Gloria Engineering** May 2014 – Oct 2018 | Pune
- Dynamic and result-oriented Quality Assurance professional with a progressive career started as a Junior QA Engineer and grew into the role of QA Lead.
 - **Achieved & maintained** zero PPM (zero quality issues at the customer) for a continuous 12 months.

PROJECTS

1. Students Expenditure Analysis & Insights – Power BI Dashboard

Objective:

- Educational institutions needed insights into student spending to design financial support programs and improve student financial well-being.

Project Highlights:

- Built an interactive Power BI dashboard to analyze student spending trends, income distribution, and financial aid impact for informed decision-making.
- Extracted and cleaned data using SQL queries and Excel functions (PivotTables, VLOOKUP) to ensure data readiness and accuracy.
- Performed data cleaning and transformation using Power Query to maintain consistency and quality.
- Created visualizations (bar charts, line charts, pie charts, KPI cards) to uncover expenditure patterns, savings behavior, and financial gaps.
- Utilized DAX to build KPIs highlighting spending habits, budgeting trends, and potential financial support opportunities.

2. Christmas Sales Performance Analysis – Power BI Dashboard

Objective:

- To evaluate holiday sales trends and guide business decisions on marketing

Project Highlights:

- Designed a Power BI dashboard to analyze sales trends, product performance, and customer buying patterns.
- Extracted and cleaned data using SQL queries and Excel functions (PivotTables, VLOOKUP), ensuring data readiness for analysis.
- Performed data modeling and transformation using Power Query and Excel.
- Built interactive visualizations (bar charts, line charts, pie charts, KPI cards) to display revenue trends, discount effectiveness, and category-wise performance.
- Applied DAX calculations to derive insights via custom columns and measures, supporting data-driven decision making.

EDUCATION

Bachelor's Of Engineering (Mechanical)

Jul 2013

CERTIFICATES
