Objective

Computer Science graduate with a strong foundation in programming, data structures and algorithms. Eager to begin a career in software development where I can contribute to real-world projects, continuously learn, and grow in a dynamic tech environment.

Education

- University of Mysuru** 2024
BCA
9.2
- National institute of engineering Mysuru** 2024-2026
MCA
8.4(first year)

Projects

- A Secure Framework for Tender Allocation Based on AWS Service**
Developed a secure e-Tendering system using **C#** and **.NET Framework**, integrated with **ADO.NET** and **SQL Server** for data management. Deployed on **AWS** (EC2, S3) to ensure scalability and secure file storage. Implemented **NLP** to analyze client reviews and added role-based access to enhance transparency and prevent fake submissions.
- College Event Management System**
web-based event management system for college using **HTML**, **CSS**, and **JavaScript** for the front end and **PHP** for backend processing. The system allows students and organizers to create, manage, and register for events efficiently. Features include user authentication, event listings, registration forms, and admin control for managing event data.

Courses And Certification

- Neural networks and Deep learning by COURSERA**
Completed Coursera's Neural Networks and Deep Learning course by Andrew Ng. Learned core deep learning concepts and implemented neural networks using Python and NumPy
- Google AI essentials by COURSERA**
Completed a foundational course on Artificial Intelligence, covering core AI concepts, real-world applications, responsible AI practices, and how to effectively use AI tools for productivity and collaboration.
-

Skills

- Programming Languages:C, basics of C++,Java, Python
- Problem solving and time management
- Good communication skills

Languages

- English Kannada
